(54) Title: SYSTEM AND METHOD FOR EXCHANGING INFORMATION AMONG EXCHANGE APPLICATIONS

(57) Abstract: In a system and method for processing messages in a gateway, a gateway message is received at the gateway, the gateway message including a gateway message header and a payload, the gateway message header including a unique message identifier block, a target block identifying where the gateway message is going, and a history block providing a log of what has happened to the gateway message. Each block in the gateway message header is processed by the gateway in accordance with a message type, the processing including determining a target application for receiving the payload. The payload is provided to the determined target application. Each block includes one or more values.
